

# DON'T GET STUCK ON A SYNCING SHIP!

## USING QUICKBOOKS DESKTOP? READ ON!

Starting May 31, 2016, many field service software packages will no longer integrate with desktop versions of QuickBooks. This change stems from Intuit's decision to discontinue Sync Manager, the means by which many third party applications integrate with QuickBooks. ([Check the official list](#) to see if your software is one of the affected programs.)

The Smart Service team loves both the robust feature set of QuickBooks Desktop and the easy accessibility of QuickBooks Online, and we're proud to say that our software will continue to work with both product lines. Our QuickBooks integration is so complete that the Sync Manager change fails to so much as rock the boat. See what industry-leading QuickBooks integration looks like today. [Request a demo!](#)
